

# HAVE YOU HAD YOUR ANNUAL MAMMOGRAM?

Women over the age of 40 and those with a family history of breast cancer should have a mammogram each year. Thanks to Saint Alphonsus - Ontario you now have state-of-the-art, digital mammography available close to home.

Saint Alphonsus Medical Center- Ontario's new Comprehensive Breast Care Center was created for your convenience. Located on the ground level of the hospital, the Center provides:

- Digital mammography
- Ultrasound
- On-site physician consultation to pinpoint breast cancer in its earliest stages
- State-of-the-art imaging for screening and diagnostics at one location
- Same-day services to maximize convenience and efficiency for our patients
- Free breast cancer risk assessment can be done at the time of screening or diagnostic appointment to evaluate the need for increased surveillance options and genetic counseling.

**If a warmer, more comfortable mammogram sounds appealing, then we invite you to visit us.**

**Your good health is our top priority.** We have recently joined an elite group of facilities across the country that share an important commitment to raising the standard of care for every patient.

As a certified **Pink Ribbon Facility** we take pride in providing every woman with a softer, warmer mammogram by using MammoPad, a soft foam pad that serves as a cushion between you and the most sophisticated digital mammography equipment. Now you can relax knowing your mammogram will be a warmer and more comfortable experience.

**Call us today to take advantage of the latest in breast cancer detection and comfort technology.**

To make an appointment call **(541) 881-7474**  
No physician referral necessary.
